

## FOLDING HAND TRUCK INSTRUCTIONS

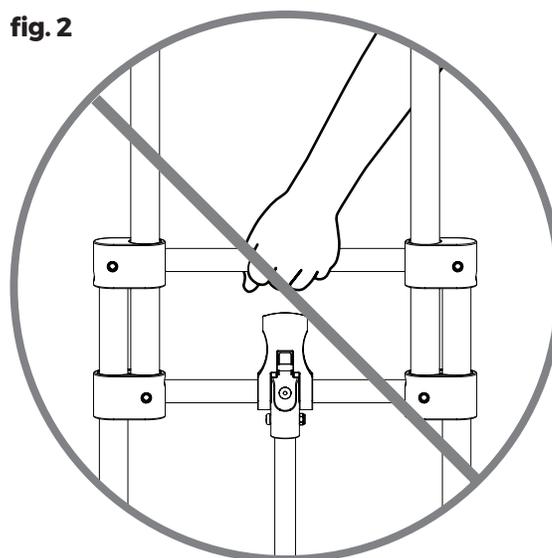

### Step 1

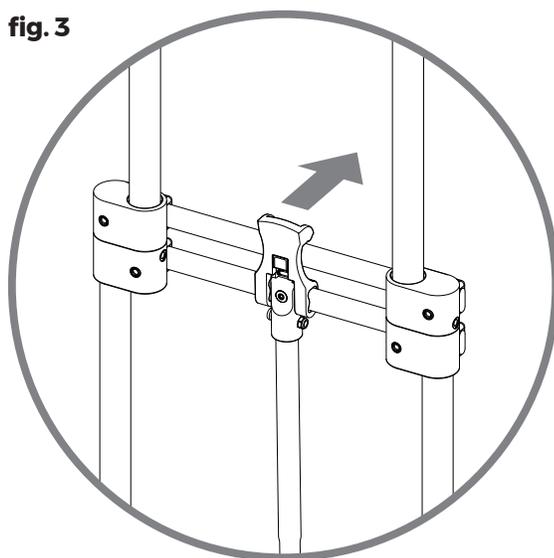

To open the hand truck, carefully pull up the handle and fold the wheels and carrying platform outward as the handle is extended (fig. 1). Do not hold the plastic clip when doing this.

### CAUTION

To avoid injury, please do not hold on to the cross bar when opening (fig 2).

**fig.3**

### Step 2

With the hand truck fully extended, latch the plastic clip onto the cross bar (fig. 3). This clip must be completely latched for the hand truck to be fully secure.

## FOLDING HAND CART INSTRUCTIONS

### Step 3

To close the hand truck, unlatch the plastic clip from the cross bar (fig. 4) and lower the handle while folding the wheels and carrying platform inward back to the collapsed position (fig 5).

### Maintenance

We recommend oiling the telescopic tubes regularly to ensure the smooth opening and closing of the unit. Make sure there are no obstructions in the wheels and check regularly that the hand truck is in good, working condition.

### Safety Tips

1. The maximum load capacity is 150 lbs.
2. Do not attempt to carry anyone on the hand truck.
3. The handle should be free and accessible during loading or transportation.
4. Place the load evenly to avoid unstable loads when transporting.
5. Use good material handling techniques. Assess the load weight and stability before loading (maximum load capacity of 150 lbs). Plan your movement path and do not walk backwards. Do not run while using the hand truck.
6. Store in a safe location when not in use. The hand truck could be a potential trip hazard to others if left unattended.
7. Use extra caution when operating the hand truck on uneven ground or stairs. Make sure others are not in close proximity to the hand truck in these situations.
